# Iron wood (Outdoor Deck Wood Flooring)

Iron wood Deck Flooring is our star product from Indonesia. It is a very heavy duty and long lasting decking option. Since the product originates from a tropical climate, it contains a natural moisture content. This means that the product requires significantly less maintenance and only annual oiling services as compared to other decking options. Ironwood is known to mimic the properties of Burma Teak, which means that it is resistant to small dents, bumps and scratches. It has grooves on one side, providing anti slip functionalities while preserving architectural aesthetics. The product may seem light weight but the product can withstand the most amount of weight in the decking category.

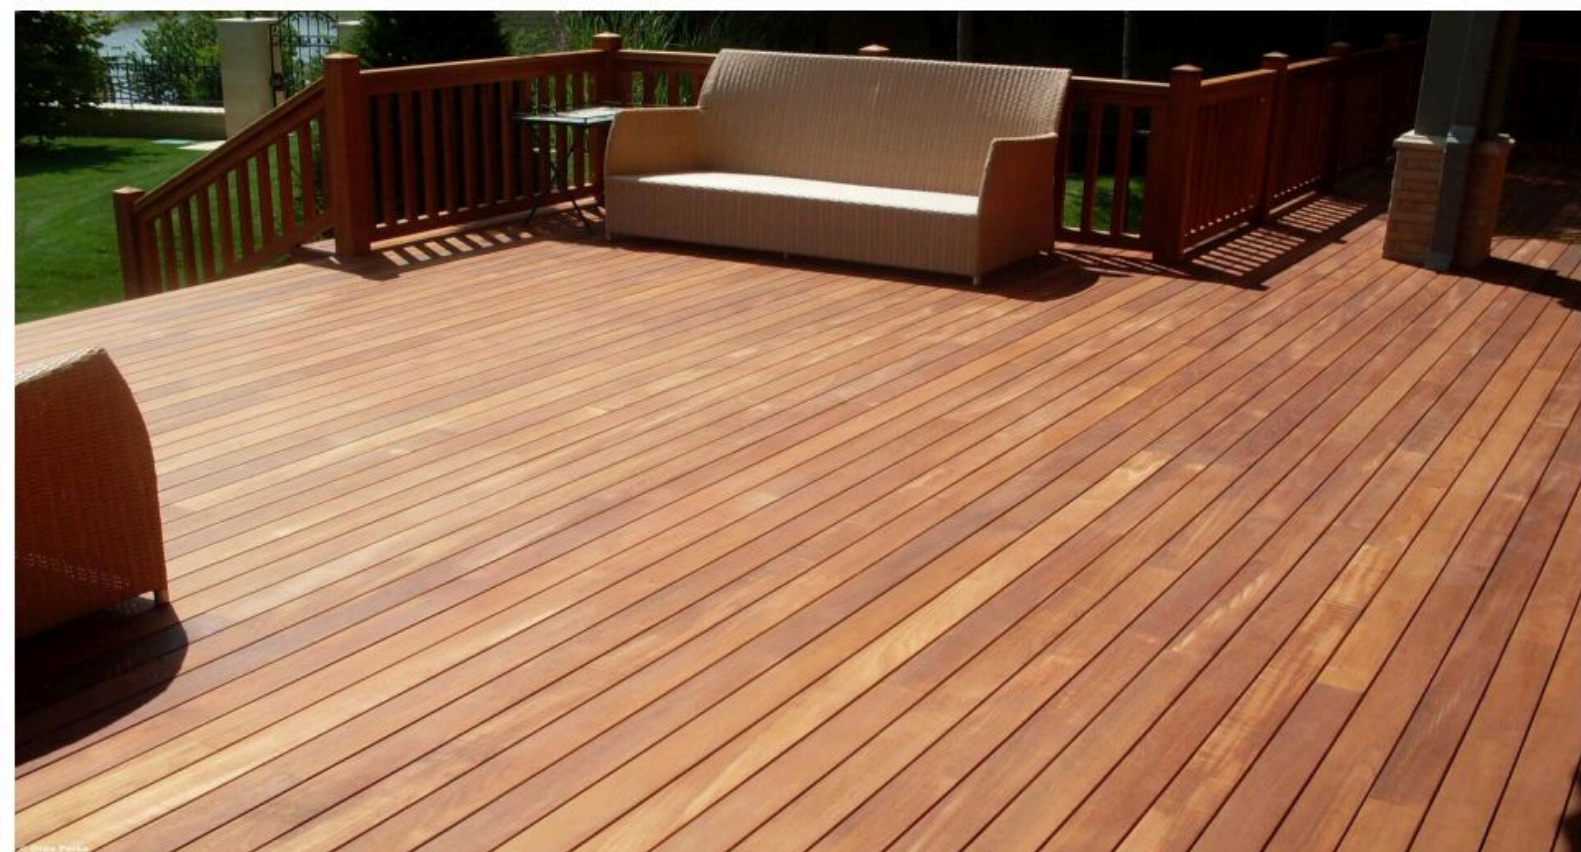

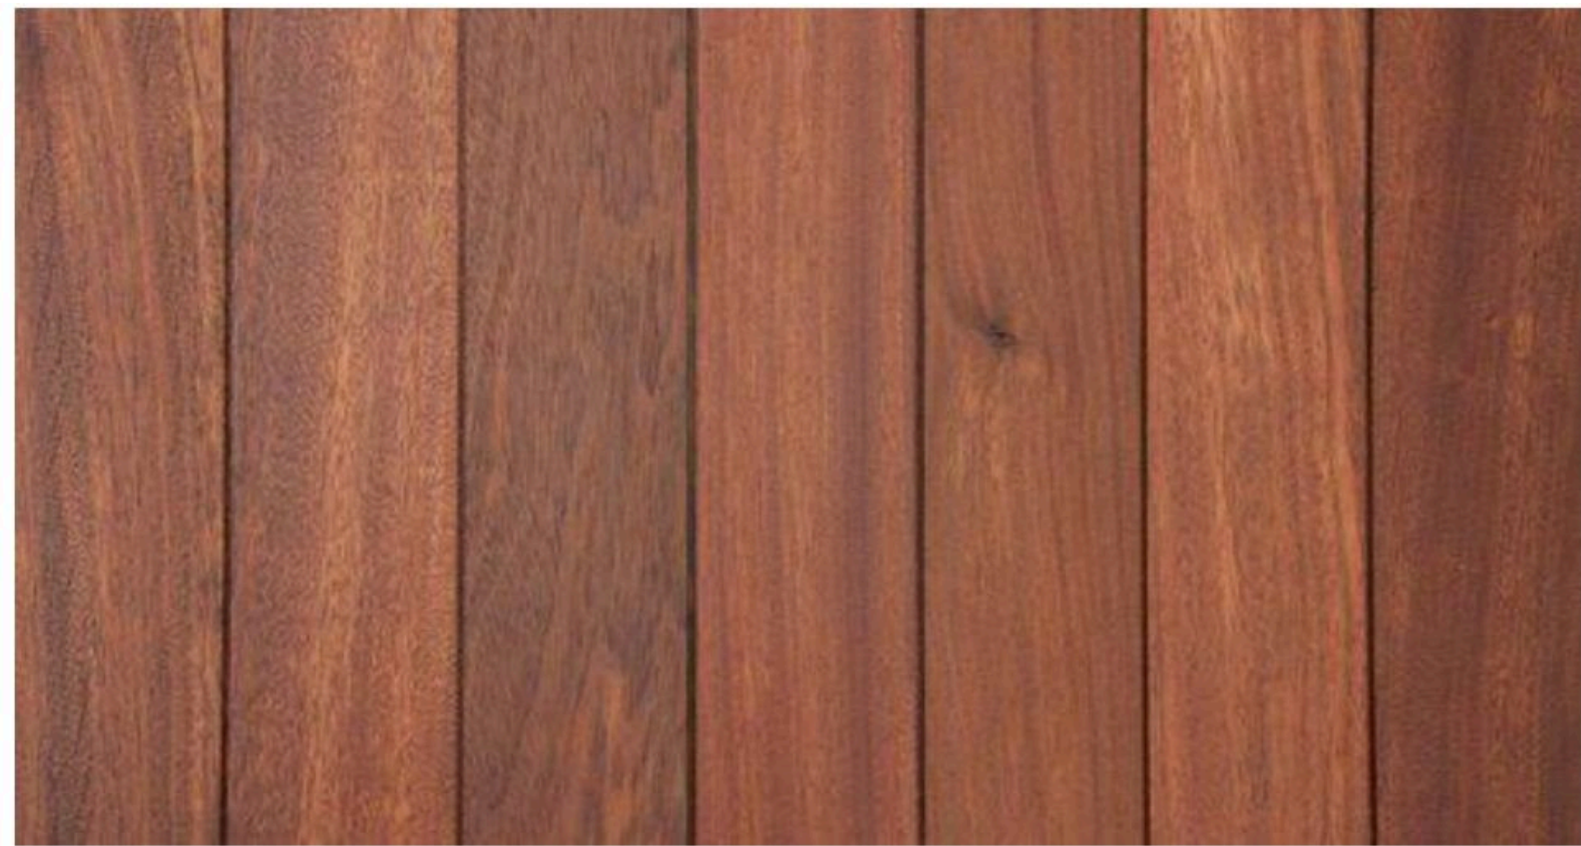

Product Name : Iron Wood

Dimension : 19 x 125 x 1200 – 1800.

# Ipe wood (Outdoor Deck Wood Flooring)

Ipe Deck Wood Flooring originates from Brazil. Because of its natural dense and tight grain, Ipe is regarded as the ultimate and long lasting decking material available. Due to the species fine texture and interlocking grain, Ipe has superior slip resistance. It provides extreme insect resistance and remains cool as it doesn't retain heat. Due to its toughness, Ipe deck can withstand extreme traffic and heavy use. It can resist mold, fungus and scratch in a very superior way compared to any other natural wood species.
